Ngô Quốc Long

SOFTWARE DEVELOPER (FULL-STACK & MOBILE)

Da Nang, Vietnam · (+84) 909 172 413 · ngolong24197@gmail.com
github.com/ngolong24197 · Google Play: Daily Reset ·

SUMMARY

Software developer who builds and ships across web and mobile. On the backend I work with Java and Spring Boot; on the frontend with React; and I have independently designed, built, and published a live Android app on Google Play. I take products end to end — REST API and database design, cloud deployment on AWS, authentication and payments, and store release — and enjoy turning real requirements into clean, maintainable software in agile teams.

TECHNICAL SKILLS

Languages: Java (Core, Java 8+), JavaScript, C#, Python (basic)

Backend: Spring Boot, Spring MVC, Spring Security, Hibernate/JPA, Node.js, .NET (basic), RESTful APIs

Frontend: React, HTML5, CSS3, Thymeleaf, responsive UI

Mobile: Flutter, Android, Google Play Console, in-app purchases (Play Billing), Google Sign-In, local notifications, AdMob

Databases: MySQL, SQL Server, AWS RDS

Cloud & DevOps: AWS (Elastic Beanstalk, RDS, S3), Docker, Maven, basic CI/CD

Auth & Security: JWT, OAuth2, OpenID Connect, SSL/TLS

Tools & Practices: Git/GitHub, Postman, IntelliJ IDEA, Android Studio, VS Code · OOP, Design Patterns, Microservices, Agile/Scrum

WORK EXPERIENCE

CVtot — Business Analyst / Automation Developer

03/2026 – Present

Da Nang, Vietnam

- Built a social-media content automation tool that generates monthly content concepts and auto-publishes posts across channels via the Buffer API, integrating Google Sheets and AI-based image generation into the workflow.
- Contributed to the Design Pickle marketing website, supporting performance, SEO, and uptime monitoring; translated client requirements into specs and coordinated delivery with the dev team.

Dsoft Company — Full-Stack Developer (Intern)

4/2025 – 12/2025

Real Estate Management Platform · Da Nang, Vietnam

- Developed a responsive UI in React for property listing, search, and transactions.
- Built backend microservices in Node.js and Python; designed RESTful APIs with JWT-based authentication and authorization.
- Wrote unit and integration tests; worked in an Agile/Scrum team with product owners, designers, and testers.

Tech: *React, Node.js, Python, REST APIs, JWT, Microservices, Git, CI/CD*

PROJECTS

Daily Reset — Published Android App

Live on Google Play

Solo Developer · Lifestyle · play.google.com/store/apps/details?id=com.dailyreset2.app

- Designed, built, and published a self-reflection app: daily quotes, mood tracking, guided journaling with photos, and a streak system to build habits.
- Implemented Google Sign-In with cloud backup, customizable reminders, a one-time in-app purchase premium tier, and AdMob monetization; own the full lifecycle through Play Console and ongoing updates.

Tech: *Android, Google Play Console, Google Sign-In, in-app purchases, AdMob, local notifications,Claude code, MCP*

Social Media Content Automation Platform

- Automation tool that connects to a client's Google Drive, reads and updates a Google Sheet that auto-suggests content ideas, and generates matching images for social posts from approved ideas.
- Streamlined the pipeline so clients review AI-suggested ideas and publish directly, cutting manual production time.

Tech: *Google Sheets API, Google Drive API, AI image generation, Buffer API, REST*

E-Commerce Platform

- Secure, scalable store with product management, order processing, and payments, deployed on AWS for high availability; optimized database queries for faster load times.

Tech: *Java Spring Boot, Thymeleaf, Spring Security, JWT, AWS (S3, RDS, Elastic Beanstalk)*

Hotel Booking System

- Full-stack booking platform with room search/filter, reservations, and secure payments via Stripe and VNPAY; secured with Spring Security and JWT.

Tech: *React, Java Spring Boot, MySQL, Spring Security, JWT, Stripe, VNPAY*

Additional projects (Library Management, Trading Platform Backend) available on GitHub.

EDUCATION

Lincoln University College — Malaysia 06/2025 –03/2027 (expected)

Bachelor of Information Technology

Aptech — Da Nang, Vietnam 2022 – 2024

Advanced Diploma in Software Engineering · Java, Web Development, Cloud Computing, Databases

Haaga-Helia University of Applied Sciences — Finland 2016 – 2020

Diploma in Hospitality Management

CERTIFICATIONS

- Google IT Support Professional Certificate — 2025
- Aptech Graduation Certificate — 2025
- Full-Stack Development with React & Java Spring Boot — Udemy, 2024
- JSP, Servlets & JDBC for Beginners — Udemy, 2024
- IELTS — Band 6.5, 2020

LANGUAGES

- **English —** professional working proficiency; strong communication, presentation, and reading skills (studied abroad in Finland).
- **Vietnamese —** native.

SOFT SKILLS

Problem-solving & analytical thinking · Strong communication · Team collaboration · Adaptability · Customer-centric mindset · Willingness to learn.
